**COMPLESSITA'
SEMPLIFICAZIONE**

«I am an aviation professional and operate within a system that is [...] terribly unforgiving of any carelessness, incapacity or neglect.

I believe our profession is, and should remain, essentially self-regulating, standing upon the three pillars of ***competence, compliance, and mutual trust*** between professional peers. [...]

I pledge to remain vigilant, not only of my own performance, but also for identifying, reporting, and if possible, correcting all threats to the safety and integrity of my proud, chosen profession.

(Dr. Tony Kern)
